

1                   **WHAT IS CLAIMED IS:**

2               1. A golf club head, comprising:  
3               a bottom face having a periphery formed with an arc-shaped face;  
4               the bottom face of the golf club head having a center formed with a  
5               receiving recess for receiving an elastic bushing made of rubber material;  
6               the receiving recess having a determined slope; and  
7               the receiving recess having a width slightly greater than a diameter of  
8               the golf ball.

9               2. The golf club head in accordance with claim 1, wherein the golf  
10          club head has an inside formed with a plurality of transverse holes each  
11          communicating with the receiving recess for adjusting the weight of the golf  
12          club head.

13              3. The golf club head in accordance with claim 1, wherein the slope  
14          of the receiving recess is ranged between four degrees and twelve degrees, and  
15          the optimum slope of the receiving recess is equal to eight degrees.
